

SECTION 1**GENERAL GUIDELINES**

POLICY 1.4	APPROVED ADULT PROCEDURES MADISON DAY SURGERY
-------------------	--

AIM/OUTCOME: To provide a patient focused quality healthcare service through appropriate patient admission protocols. The facility strives to provide a safe and risk free patient episode of care and ensures appropriate patients are admitted.

POLICY REFERS TO: Accredited Medical Practitioners
Clinical Nursing Staff
Administration Staff
Orthoptic Staff

POLICY:**MADISON DAY SURGERY**

All procedures performed in the facility are approved by the Medical Advisory & Audit Committee (MAAC) and are suitable to be performed in a facility licensed to perform surgical procedures under all types of anaesthesia.

All procedures are classified as suitable for day surgery because they meet the criteria of :

- Minimal risk of post operative haemorrhage
- Minimal risk of post operative airway compromise
- Controllable post operative pain with outpatient management techniques,
- No special post operative nursing requirements that cannot be met by community nursing
- Rapid return to normal fluid and food intake
- All necessary equipment is available prior to a procedure being undertaken.

The Classes proposed at Madison Day Surgery (MDS) are Surgical, Cosmetic and Anaesthesia.

A Surgeon wishing to perform a new procedure that does not appear on this list has to apply to the MAAC for approval as per L&M Policy 2.11 '*Application for Privileges to Perform New Procedures or Technology*' which is located in the Leadership and Management Policy Manual.

LENS PROCEDURES [MBS ITEM NUMBERS INCLUDED]

- Artificial lens, insertion / removal / replacement / repositioning [42702, 42701, 42709, 42719, 42703, 42704]
- Capsulectomy or removal of vitreous via the anterior chamber [42719]
- Lens extraction [42707, 42716]

CORNEAL PROCEDURES

- Corneal grafts [42659, 42656, 42653]
- Crosslinking [42652]
- Incisions to correct astigmatism including AK [42672]
- Other vision correction procedures including PTK [42810]

GLAUCOMA PROCEDURES

- Insertion of drainage devices/implants [42752]
- Cataract extraction and insertion of Micro Incisional Glaucoma Stents [42705]
- Removal of Micro Incisional Glaucoma Stents [42505]
- Trabeculectomy [42746, 42749]
- Needle Revision of Glaucoma Filtration Bleb [42744]
- Cyclodestructive procedures [42770]
- Implantation of micro-bypass surgery stent system [42504]

VITRO RETINAL

- Intravitreal injections [42739] Sedation
- Intravitreal injections [42738] Local Anaesthetic

OCULAR PLASTICS

- Botulinus toxin injection for strabismus [42842]
- Canthoplasty [42590]
- Dacryocystorhinostomy (DCR) [42623, 42626]
- Dermoid cyst / orbital cyst [42574]
- Ectropion repair [45626]
- Entropion, repair [45626, 42866]
- Eyelid closure in facial nerve paralysis with insertion of foreign implant [45614, 42869, 45587]
- Eyelid upper and lower procedures – blepharoplasty / reconstruction [45617]. This may include **cosmetic/plastic procedures** with/ without an MBS item number.
- Foreign body removal [42569]
- Lacrimal procedures [42611]
- Orbital procedures – exploration / removal / repair [42515, 42557, 42533, 42510]
- Pterygium removal [42686]
- Pterygium & Auto Conjunctival Graft [42641]
- Readjustment of sutures [42668]
- Removal of foreign body- anterior aspect [42542]
- Resuturing of wound [42857]
- Scleral graft to upper or lower Lid [42641, 42665]
- Squint procedures [42836, 42833, 42839, 42842]
- Tarsal cysts [42575]
- Excision of lesions with or without reconstruction [45614' 45665]
- Ptosis [45623]

OTHER

- Anterior chamber irrigation [42599]
- Ciliary body Tumour excision [42584]
- Cyclodiode laser [42770]
- Examination under anaesthetic (EUA) [42503]
- Goniotomy [42758]
- Limbic tumour procedures [42692]
- Paracentesis of anterior or posterior chamber [42740]
- Pinguecula removal [42573]
- Temporal Artery Biopsy [34109]

DERMATOLOGY / PLASTICS / REPRODUCTIVE

- Minor excisions of skin lesions with or without skin graft [31255, 45207, 45003, 31275]
- Vasectomy [37623]

FACILITIES AND EQUIPMENT

- The facility has appropriate surgical instrumentation, consumable and equipment for the safe provision of care to adult patients.
- Specific adult anaesthetic equipment and consumables are provided on the Anaesthetic "Morgan" trolley for the case-mix. The centre does not have an Anaesthetic machine.

- An adult emergency trolley (Resuscitation Trolley) for emergency adult care and resuscitation is provided.
- The Anaesthetic representative on the MAAC together with the Facility Manager/Director of Nursing annually reviews the provision of anaesthetic and resuscitation facilities and equipment consistent with The Australian and New Zealand College of Anaesthetists (ANZCA) and the Australian Resuscitation Council (ARC) guidelines and standards; or as and when new adult procedures are approved by the MAAC.
- Compulsory advanced resuscitation training is provided to all nursing staff annually.

PERFORMANCE INDICATORS:

This policy relates to entries on the Risk Register (Policy L&M 3.6) and audited annually:

Clinical – Patient Centred Care – Clinical Risk

Audited Against:

1. QPS Audits and Indicators: Patient Complaints, Incidents and Near Misses, Patient Satisfaction
2. PMA Reviews and Indicators: Anaesthetic Drug & Equipment, Emergency Trolley & Pharmacy Review, External incidents, Emergency Event – Rapid Response/Escalation of Care by Carers.
3. ACHS Clinical Indicators: Adverse Events, Unplanned Transfers, ICU Admissions post-op
